- Vue.js
- Laravel
- Spring Boot
- MySQL
- Java
- JavaScript
- Node js
- PHP
- CSS
- HTML
- WordPress
- TypeScript
- AWS
- Docker

Work experience

Simpliaxis Pvt Ltd
Jan 2025 - Present

Utilizing Microservices with Laravel and XAMPP local server

Omakoeion Services Ltd
Cyprus
Nov 2023 - Dec 2024

Utilizing Microservices with Laravel and XAMPP local server

Softsuave Technologies
Chennai
Oct 2021 - Nov 2023

- Designed and developed full-stack web applications that processed, analyzed, and rendered data visually using HTML, CSS, JQquery, and TypeScript.
- Worked with REST APIs to retrieve and display data from databases.

STG Infotech Solutions
Chennai
Oct 2018 - Nov 2021

- Designed and developed full-stack web applications that processed, analyzed, and rendered data visually using HTML, CSS, JavaScript, and TypeScript.
- Worked with REST APIs to retrieve and display data from databases.

Projects

Mework (12/2019 - 05/2021)

- My role of this project I was handle both Frontend and Backend
- My frontend technology is Vue JS and My Backend technology is Spring boot
- Component Development: I created reusable and modular Vue components to construct the frontend of the application.
- API Integration: I connected the frontend to backend services and APIs, managing data fetching and updating to ensure a seamless user experience.
- Code Quality: I upheld high code quality standards, adhering to best practices in Typescript and React development.

Partz World (06/2021 - 12/2022)

- Created and customized WordPress plugins in PHP to add unique functionalities tailored to the eCommerce platform.
- Enhanced and extended WooCommerce features, including dynamic pricing, product filters, and payment gateways, to meet specific client requirements.
- Customized themes for responsive design, aligning with the client's branding and delivering a seamless user experience across devices.
- Maintained high code quality by following WordPress coding standards and optimized database queries for improved performance.

Education

Aringar Anna Institute Of Science And Technologies,
2016-2018
Master of Engineering
Chennai

Veltech Hightech Engineering College,
2012-2016
Bachelor of Engineering
Chennai

Parking Hero (12/2022 - 05/2023)

- My role of this project I was handle both Frontend and Backend
- My frontend technology is React JS and My Backend technology is Spring boot
- Component Development: I created reusable and modular React components to construct the frontend of the application.
- API Integration: I connected the frontend to backend services and APIs, managing data fetching and updating to ensure a seamless user experience.
- Code Quality: I upheld high code quality standards, adhering to best practices in Typescript and React development.
- Utilized React Router Dom for routing. Using state management library Redux in this project.

Dynafios (06/2023 - 11/2023)

- My role of this project I was handle both Frontend and Backend My technology is Laravel.
- Backend technology is Laravel and I'm using Spatie package for roles and permission check in this project
- Developing APIs : develop APIs that allow the front end application to interact with the database. This includes creating routes, controllers, and models to handle CRUD operations.
- Database Management : handle Database properly in MySQL. Laravel using eloquent query and models with migration to get data from DB. Respond proper response for frontend to handle proper permission.
- Documenting the code : Documenting the code to make it easy for other developers to understand and maintain it

Crypto Payment Gateway (11/2023 - 12/2024)

- My role of this project I was handle both Frontend and Backend My technology is Laravel.
- Utilized Microservices in this project.
- Developing APIs: Implemented API services to communicate with the backend.
- Database Management: Managed multiple jobs and used database migration files for database management.

Simpliaxis (01/2025 - Present)

- My role of this project I was handle both Frontend and Backend My technology is Laravel and React Js.
- API Development: Implemented RESTful API services for seamless communication between frontend and backend.
- Database Management: Utilized Laravel's migration system to manage multiple job-related data structures and maintain database versioning.
- Redis Usage: Implemented Redis for caching and queue management to optimize performance and enhance real-time operations.
- Mobile Notifications: Integrated Interakt, a third-party WhatsApp Business API provider, to send real-time mobile notifications for critical user interactions and status updates.
